PRESS RELEASE

DATE: JAN 2, 2019 - FOR IMMEDIATE RELEASE

DARTON launches MAVERICK XT for 2019 with innovative improvements to its legendary line up of Pro Series bows

MAVERICK XT, A Must Shoot!

The **Maverick II** has been improved with the introduction of the **NEW Dual Sync XT Cam**. The **NEW Maverick XT** utilizes the Darton patented Dual Sync Cam and Yoke System with its **NEW Adjustable Module System** that makes it easy to '*fit the bow to you*', while providing a few additional fps of speed.

Only a bow like this would be worthy of the **Maverick** name, once the flagship of Darton's Bow Line. The new **Maverick XT** has quite a reputation to live up to and we feel it is up to the task. Once you shoot the **Maverick XT** we are sure you will agree. You will find this bow to be more compact and impressively fast, with no vibration after the shot. It will instill a feeling of confidence few bows can.

> SPECIFICATIONS:

SPEED: **340-345 FPS** | AXLE-TO-AXLE: **33"**
